English, Amharic, Nuer

Overview

Tango Tew is an accomplished IT professional with over 5 years of experience in cloud computing, DevOps, and full-stack engineering. Recently earning a Master's in Artificial Intelligence from Southern Methodist University, he has contributed to impactful AI projects focused on streamlining open-source technologies. Tango remains at the forefront of tech innovation, helping organizations adopt advanced tools and processes across industries such as technology, energy, insurance, and hospitality, with a passion for empowering teams and driving operational excellence.

Relevant Experience

Senior DevOps Platform/DevOps Engineer, Retail

- ▶ Implemented automation and CI/CD pipelines, improving deployment frequency by 12x.
- ▶ Spearheaded a legacy-to-modern DevOps transformation, fostering team agility and productivity.
- ▶ Facilitated migration from Elastic Beanstalk to EKS and AWS DNS to Cloudflare, enhancing scalability, reducing technical debts, and centralizing cloud management.
- ▶ Provisioned and managed cloud resources and configurations ensuring seamless operations and improving reliability, resulting in enhanced client and customer satisfaction.
- ▶ Built custom AI agents that are seamless to integrate into the engineering teams eco-system and reduces 30hours of mundane and repetitive tasks allowing efficiency on core business go to market.
- ▶ Built AI workflows that help in brainstorming on different architecture patterns to build an effective production software and deploy it.

Cloud Solution Engineer, Insurance Client

- ▶ Designed and implemented a microservices architecture using Kubernetes, ASP.NET Core, and MongoDB to optimize business operations.
- ▶ Provisioned microservices to AKS clusters and trained client teams on resource management.
- ▶ Provisioned training microservices into AKS clusters, empowering client teams to adopt new microservice architectures.

Team Lead, Internal EY Project

- ▶ Led the development of a product maturity assessment tool using Azure DevOps, Function Apps, and Angular.
- ▶ Mentored new team members and ensured smooth project delivery under resource constraints.
- ▶ Mentored engineering teams on leveraging AI technologies responsibly to enhance productivity, streamline workflows, and elevate the quality of deliverables.
